### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Claims 18-37 are pending as preliminarily amended on 3/3/05. Even though this application is a PCT 371, USPTO rules apply for the restriction requirement because of this amendment.

### ***Election/Restrictions***

This application contains claims directed to the following patentably distinct species:

- A. Nine (9) different species represented by each of Figures 1 and 5-12,
- B. Several Species represented in claim 27, *non-permeable* or transparent cover material
- C. Several Species represented by different cover materials of claim 28: self-sealing, or permeable covers.
- D. Several Species having immobilized reagents as in claim 32
- E. Species having particles that enable a substance-specific treatment
- F. Species having a carrier with devices for securing, supplying or removing media.

The above listed species represent a complex selection of choices. Each of the groups A-F has several independent species within the group, and several of these choices from A-F are combinable to form several other species/inventions.

The species are independent or distinct because they are mutually exclusive and represent independently patentable subject matter.

Art Unit: 1723

Applicant is required under 35 U.S.C. 121 to **elect a single disclosed species for prosecution on the merits to which the claims shall be restricted** if no generic claim is finally held to be allowable. **Applicant is also required to show where the elected species is disclosed in the specification.** Currently, claim 18 is generic.

**Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added.**

An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

A telephone call was NOT made to the attorney of record because of the complexity of the species election/restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

Art Unit: 1723

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krishnan S. Menon whose telephone number is 571-272-1143. The examiner can normally be reached on 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David R. Sample can be reached on 571-272-1376. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
